FORMULARY

<u>Ingredient</u>	<u>Wt %</u>
Water	Balance
Flexicon LC-65	25-50.0

- Add LC-65 to water and mix until uniform. Add preservative, fragrance and dye as desired. Adjust LC-65 use level based on cost/performance properties desired. Thick and creamy formulations can be supplied on request if desired.

- Wipe or spray on and wipe off with soft cloth.

Note: Unfinished leathers will be slightly darkened. Always test the product in an inconspicuous area to make sure treated appearance is acceptable.

TYPICAL PROPERTIES

Appearance	Creamy white liquid
Density @ 25C	0.99 g/ml (8.2 lbs/gal)
pH (2%)	6 to 7.5
Water Solubility	Dispersible
Boiling Point	100° C

PACKAGING/HANDLING

Flexicon LC-65 is available in 55 gallon drums (Net Wt. 440 lbs) and 5 gallon pails (Net Wt. 40 lbs).
DOT Classification is Non Regulated.

Note: Be sure to review ICT's Flexipel AM-99 designed specifically for producing oil/water repellents for finished leather. Also Flexisorb AQ-50 UV absorber which can be incorporated into Flexicon LC-65 to provide UV protection.
